

AWS Cloud Optimisation

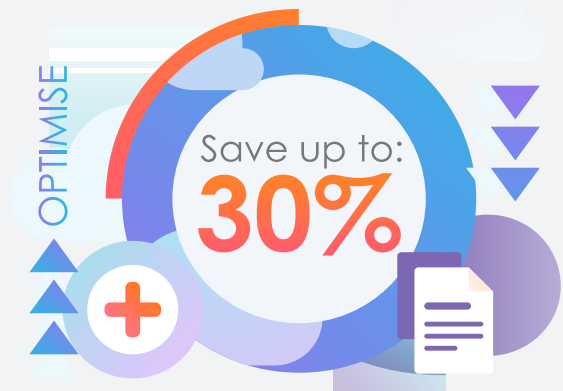

Maximise the value of your cloud

How would you describe your company's ability to track, manage and optimise public cloud relate costs?

Learn how you can save up to

 **30%**

on your public cloud infrastructure

State of the Cloud

Public cloud spend is a significant line item in IT budgets, with wasted cloud spend becoming a major issue and more critical as cloud costs continue to rise. Managing your public cloud spend can become increasingly challenging

when working across multiple public clouds and hybrid workloads. Over time, visibility of spend becomes complicated, cost management becomes labour intensive and excessive cloud costs can creep in.

Our Service Benefits at a Glance

Here at The Missing Link, we provide in-depth knowledge across the public cloud – from planning and designing to building and optimising workloads.

Our cloud assessment is designed to help you achieve total visibility cloud management – all in one place – to immediately uncover a cost saving of up to 30%.

With an architectural review, we can help you discover opportunities for optimising your configuration and costs while preserving the availability and performance of your cloud environment.

Our report provides a historical and current AWS spend to help you take clear, prioritised steps of remediation.

Reduce Costs

Add dollars back into your budget by identifying immediate opportunities for savings.

Eliminate Risks

Implement best practice architecture with our review of your security, governance and compliance.

Gain Control

Make better decisions faster with a single view into your cloud costs, usage and performance.

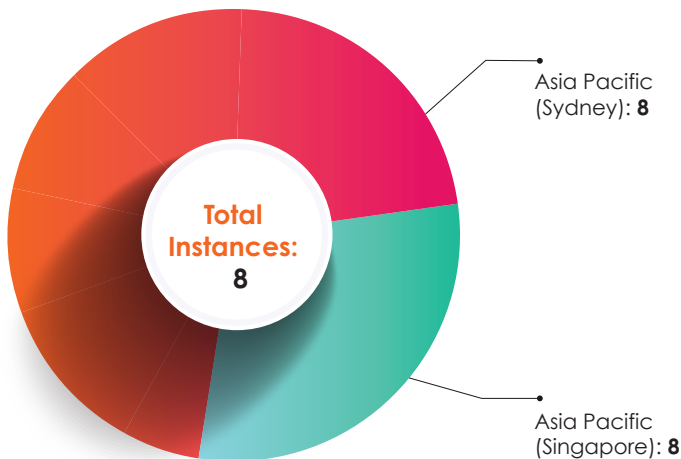

Accelerate Value

Achieve a better ROI by reducing cloud infrastructure costs and improving efficiencies.

Cloud Optimisation

A deeper look into our assessment

SUMMARY					
Total Instances	8	Total Load Balances	0	Total EBS Snapshots	0
Total EBS Volumes	23	Total Placement Groups	0	Total Elastic IPs	0
Total Security Groups	21	Total EC2-VPC Security Groups	21	Total Key Pair Values	3
		Total Running Instances	8	Total EC2-VPC Classic Security Groups	0

Feb 23 Through 12.am UTC Cost: \$0.15 Credits: \$0.00	Feb 22 Complete Day Cost: \$3.68 Credits: \$0.00
Month-to-Date Through Feb 23 Cost: \$74.41 Credits: \$0.00	Previous Month MTD Through Jan 23 Cost: \$0.00 Credits: \$0.00
Predicted Bill Current Month Cost: \$91.39	Previous Month Bill For Complete Month Cost: \$19.95 Credits: \$0.00
Average Daily Bill Current Month Cost: \$3.38 Credits: \$0.00	Average Daily Bill Previous Month Cost: \$0.064 Credits: \$0.00

COST SAVINGS					
Possible Monthly Savings	\$141.02	Idle Resources	\$98.64	Unused Resources	\$6.24
Potential Spot Savings	\$45.12	Mis-Provisioned Resources	\$0.00	Previous generation Resources	\$0.00
		Reserved Purchase Recommendations	\$36.14	Other	\$0.00
