

HCL BigFix

Find More, Fix More & Do More

With HCL BigFix, IT Security and Operations teams can collaborate more effectively to reduce security risks, cut down operational costs, compress endpoint management cycles, enforce continuous compliance, and improve productivity. BigFix provides organizations with a single solution to manage EVERY endpoint.

Benefits & Value

Tool Consolidation: IT organizations can optimize resources and consolidate tools using a single management platform to secure and manage all endpoints. BigFix supports over 100 different operating systems and variants. By consolidating tools, BigFix will slash IT costs, reduce security and operations complexity, and optimize IT staff.

Continuous Compliance: BigFix continuously enforces patch and configuration compliance using thousands of out-of-the-box security checks in alignment with industry standard security benchmarks published by CIS, DISA STIG, USGCB and PCI-DSS.

Automation: BigFix Fixlets™ automates many routine and daily operations tasks. More than 500,000 out-of-the-box Fixlets are available and the BigFix team is continuously updating the library with over 130 content updates per month, available on BigFix.me.

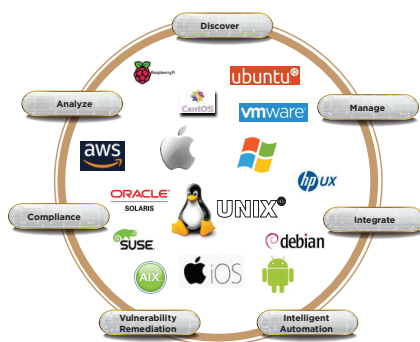

Complete Visibility and Control: BigFix is a single endpoint management platform that supports Windows, Linux, UNIX, macOS, iOS, iPadOS and Android and allows all endpoints to be viewed and managed from one user interface. Having complete visibility to the entire fleet of endpoints simplifies endpoint management and reporting.

Process Optimization - By streamlining and standardizing endpoint management processes, BigFix customers can manage their fleet of endpoints with 70-80% less effort and a first pass patch success rate of > 97%. Remediation time and effort is minimal with BigFix Insights for Vulnerability Remediation.

Capabilities

- Cross-platform, real-time visibility, and management of endpoints, including asset discovery, patch management, software distribution, OS provisioning, powered by BigFix Lifecycle.
- Continuously monitor and enforce endpoint security configurations to ensure compliance with regulatory or organizational security policies, powered by BigFix Compliance.
- Comprehensive software asset inventory for license reconciliation or compliance purposes, powered by BigFix Inventory.
- Enable deeper data analysis across traditional on-premise, cloud, and modern client devices, powered by BigFix
- Remediate vulnerabilities in hours, not weeks nor months with BigFix Insights for Vulnerability Remediation Insights.
